

Testimonial

I have proudly worked within the Hospital School for the past 11 years, joining the Trust initially as a Community Teacher. In this role, I taught students within their home environments, supporting some of the most vulnerable learners and gaining invaluable experience before completing my NQT year.

Since then, the Trust has played a pivotal role in my professional development. Through continuous encouragement and a strong commitment to staff growth, I have progressed from an NQT into more specialised roles, including SENDCo and qualified Access Arrangements Assessor. I have also been supported to complete Teacher Subject Specialism Training in Mathematics, strengthening both my subject knowledge and confidence in delivering high-quality teaching.

I have also had the pleasure of working across all sites within the Hospital School, which has given me a rich and varied perspective of the provision and allowed me to collaborate with a wide range of dedicated colleagues.

What stands out most about working here is the unwavering support and investment in staff. Opportunities for progression are actively encouraged, and I have always felt valued and empowered to develop my skills to better meet the diverse needs of our pupils.

Being part of the Hospital School is incredibly rewarding. The unique environment, combined with a committed and compassionate team, makes it a place where both staff and students can truly thrive.
